FJ Cruiser Winch Plate Cover Install. .... 3

## Disclaimer

Expedition One is not responsible for any damages to vehicle.  
We always recommend professional assistance when  
installing our vehicle products.

Included Hardware:

- Winch Cover Plate
- (6) 3/8" x 1" button head socket stainless steel bolt
- (6) USS Flat Washers
- (6) 3/8"-16 Nylon Insert Nuts
- Anti-seize Lubricant

Skill Level:

2/5 Stars

NOTE: Before you tighten nuts on bolts, use provided anti-seize lubricant so you will be able to remove them later if needed.

1. Take a bolt and put it through one of the top four holes on the winch cover plate
2. Place cover over opening on bumper
3. Using a washer and nut, secure the cover by “sandwiching” the bumper edge between the winch cover and the washer. Please note, the bolt does not go into a hole, it is secured in place with the washer and tightened nut.
4. Repeat on all six bolts. License plate can then be mounted using the holes on the folded edge.
