FJ Rear Camera Bracket Install 3

Disclaimer

Expedition One is not responsible for any damages to vehicle.
We always recommend professional assistance when
installing our vehicle products.

Installation

Place the square piece inside the tire mount bracket.

Insert round piece in center (as shown), then add Expedition One camera bracket.

Large bolt goes through the round hole to secure.

Wiring goes through the U-shaped opening.

The camera stays mounted to the OEM sheet metal bracket that came with your camera. That secures to the Expedition One bracket using the small hole on the left (photo seen to the right). Small elongated hole on the right aligns the sheet metal piece.

Finished View (seen right)
