Expedition One is not responsible for any damages to vehicle or injury. We always recommend knowledgableprofessional assistance when installing our vehicle products.

Always follow safety procautions including the use safety gear and devices.

REMOVING HARDWARE AND LOWER BUMPER

Remove the front bumper hardware from both lower front wheelwell locations and frame mounts. Next disconnect the front bumper's parking sensors and lighting wiring harnesses via the connector located in the corner of the bumper. Remove the lower front portion of the bumper.

2 TRIM AND BUMPER PANEL

Disconnect the plastic trim located on the under side of the upper bumper. Next Remove the bumper panel piece by disconnecting the trim tabs under the grill and headlights.

TRIM AND BUMPER PANEL CONTINUED.

Remove the remaining plastic trim by unbolting the center section and corner mounting locations.

3 PREASSEMBLY OF THE BUMPER

Assemble the bumper by mounting the side wings to the center section to the bumper using 1/2" hardware. Mount the clevises as shown with the provided spacer placed in the top two holes. Use the provided shim piece to adjust the gap between the wings and center as needed. Reinstall OEM parking sensors.

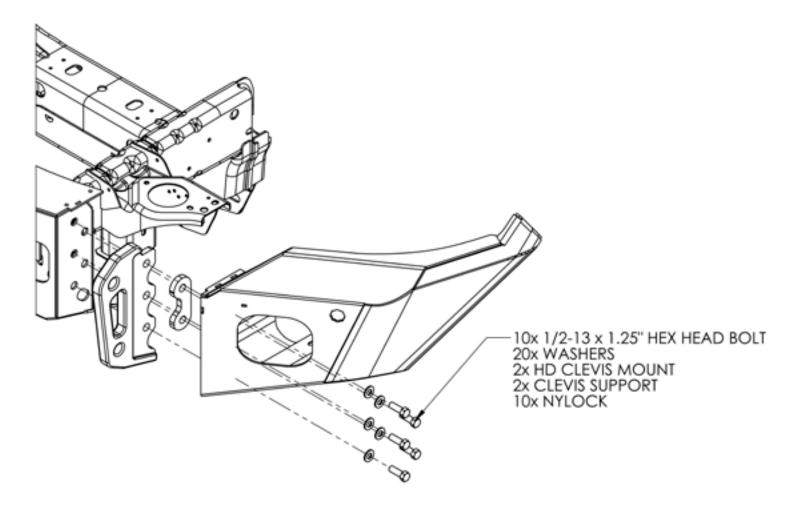

PARKING SENSOR WIRING

When reinstalling parking sensor wiring, thread the wiring loom though the circled location as shown

Install the all OEM parking sensor bezels before connecting the parking sensors. Bezels may need to be trimmed to fit.

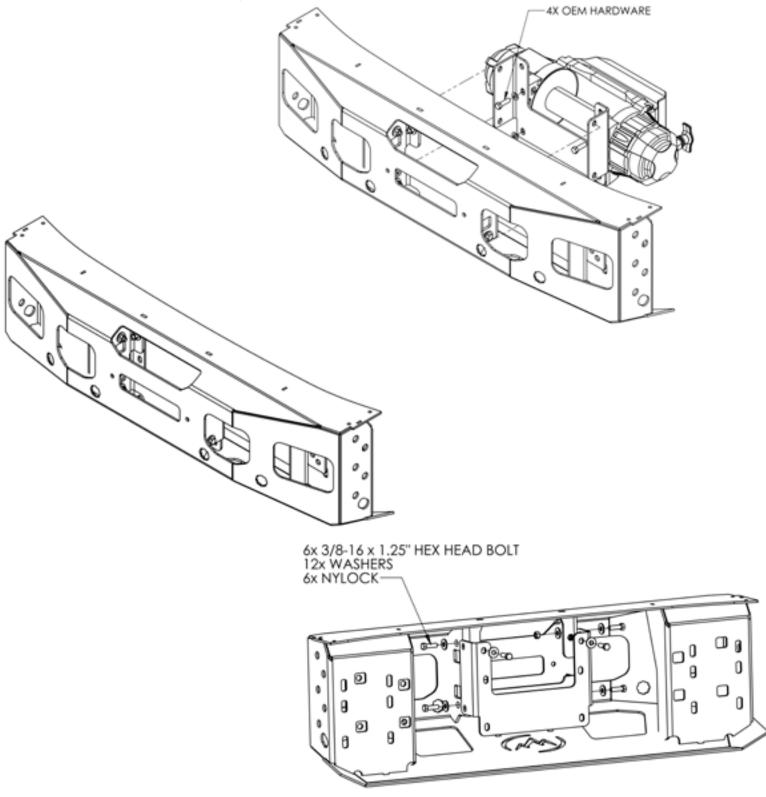

The OEM wiring loom may require extension to reach the sensor locations. Wiring not provided

FRONT BUMPER ASSEMBLY CONTINUED

WINCH PLATE ASSEMBLY

Mount the provided winch plate using OEM hardward to the winch before installing in the bumper using the 3/8" hardware.

4 FRONT BUMPER INSTALLATION

Mount the front bumper as shown using the mounting plates and hardware provided to both sides of the vehicle. Align and level the bumper allowing for even gaps between body panels. Leave all hardware loose and tighten once the bumper is in the desired location.
